## **Caring for our Patient and Employee Community** *Coronavirus (COVID-19) Precautions*

As we continue to monitor the coronavirus (COVID-19), we want to share that we are taking measures to maintain a safe and clean care environment for our patients, medical colleagues and employees.

- Hygiene standards for our staff, fitting rooms, and devices are always in place. We are regularly disinfecting all high-touch areas.
- Employees are handwashing with soap and water for 20 seconds and/or using an alcohol-based hand rub with 60-95% alcohol. We encourage our patients and visiting colleagues to do the same.
- If you cannot make your appointment because you feel sick, we ask you to please reschedule the appointment.

We are closely monitoring updates from the Centers for Disease Control and the World Health Organization and will continue to seek guidance from these agencies and public health officials. We will also update our policies to ensure we are providing the resources for our patients and company on an ongoing basis.
